DOBRONRAV

Not just a good watch, but also a good soul!

The new 'DOBRANROV' model by Poljot-International will surprise you - not only with its inspiring story but also with its technical sophistication. The name 'DOBRANROV' has historical roots, as it is a traditional Slavic surname. Translated, this name means something like a person with a good soul, which gives the model a special emotional significance.

However, technically, this model is anything but 'historical'; it has something truly special to offer: its standout feature is the automatic movement with a micro-rotor.

A micro-rotor is a small, off-center rotor that is part of the watch's winding mechanism. Unlike a traditional central rotor that covers the entire back of the movement, the micro-rotor is compactly integrated into the movement, allowing the beauty and complexity of the mechanism to be more visible. This design also enables the model to be flatter and smaller, measuring only 9.5 mm in height and having a diameter of 42 mm instead of the usual 43.5 mm. A technical masterpiece, it offers both functional and aesthetic advantages and is highly regarded in the watchmaking world for its elegance, efficiency, and enhanced wearing comfort.

The watch's design, in turn, is inspired by historical elements. The 3D-style Arabic numerals and blued hands make it easy to read the time and are pleasing to both the eye and the soul. A playful detail is the off-center red second hand.

The watch is traditionally worn on a calf leather strap, providing a very comfortable fit. With a limited edition of only 100 pieces and its exceptional technical features, this watch is a rare gem with a soul that you won't find just anywhere.

Technical Data Model "Dobronrav":

Reference Number: 5501.1910111

Price: € 850

Movement: Automatic with Micro-Rotor, Caliber 5501, 28,800 A/h, shock-resistant, 42-hour power reserve
