TOURBILLON DYNASTY

A dynasty united on a dial!

The name of this tourbillon, "Dynasty", was chosen for good reason, as the dial encapsulates an entire historical Russian narrative - essentially, an entire dynasty.

The Russian tsars of the Romanov dynasty are depicted on the dial, from the founder Michael Fedorovich to the last tsar, Nicholas II., including Peter the Great, Catherine II., Elizabeth, and several others.

To appropriately honor these significant figures, their depiction was crafted using a high-precision 3D printing process, applied in multiple layers on the dial. This technique is new to the Poljot-International brand and was used for the first time in this special tourbillon, making this model truly unique. To enhance the overall design, the Romanov family crest was created as a high-quality applique, earning its rightful place at the 12 o'clock position.

The classically designed hour and minute scale is placed as an outer ring on the dial. The time is indicated by an elegant, slim central hour and minute hand, while the seconds are visualized by the arrow on the tourbillon bridge. The elegant case has a diameter of 42 mm and is perfectly proportioned with a height of just 9.5 mm without the top glass and 12.47 mm with the domed sapphire crystal, making it suitable for almost any wrist.

The 3400.PTS movement was chosen as the ideal mechanism, offering essential functions such as hour, minute, and second indications, along with the striking tourbillon cage prominently positioned at 6 o'clock. The seconds are displayed via the innovative "Tourbillon Bridge" by Poljot-International, designed in the shape of an arrow. The movement's bridges are adorned with Geneva stripes and decorated with blued screws. The movement provides a power reserve of at least 72 hours when fully wound, allowing the watch to be wound only every three days.

Worn on a black crocodile leather strap and limited to only 100 pieces, this exceptional tourbillon, which combines historical significance with modern innovation, is a true collector's item for enthusiasts.

Technical Specifications Model "Dynasty":

Reference Number: 3400.T-DYN-1

Price: 1,995 EUR

Movement: Manual-winding Cal. 3400, Minute Tourbillon, 28,800 A/h, shock-protected, 72-hour power reserve

Functions: Hours & Minutes, Seconds via Tourbillon Bridge, Tourbillon

Case: Stainless steel with exhibition case back, 5 atm

Diameter: 42 mm

Height: 9.5 mm

Crystal: Sapphire crystal on both sides

Dial: White with 3D printing and yellow gold-plated appliques

Hands: Blued stainless steel

Strap: Black crocodile leather strap

Limited Edition: 100 pieces

Reference Number: 3400.T-DYN-2

Price: 2,095 EUR

Movement: Manual-winding Cal. 3400, Minute Tourbillon, 28,800 A/h, shock-protected, 72-hour power reserve

Functions: Hours & Minutes, Tourbillon

Case: Stainless steel, IP yellow-plated, with exhibition case back, 5 atm

Diameter: 42 mm

Height: 9.5 mm

Crystal: Sapphire crystal on both sides

Dial: Black with 3D printing and yellow gold-plated appliques

Hands: Yellow gold-plated

Strap: Black crocodile leather strap

Limited Edition: 100 pieces
