JAROS GMT

Elegance Meets Functionality: The Perfect Watch for Every Day.

The "Jaros" GMT model is designed in a classic and elegant style to make it suitable for any everyday situation. It stands out not only for its understated design but also for its smaller and thinner 42 mm case, making it slimmer than the usual 43.5 mm models in the collection. This automatic model is therefore well-suited for multiple genders.

Inside the watch is a high-quality Seiko GMT movement – NH34. A mechanical watch with a GMT display shows not only the local time but also a second time zone. GMT stands for "Greenwich Mean Time," which originally referred to the mean solar time at the Prime Meridian in Greenwich, England.

The GMT display is represented by a separate hand with a triangular tip on the outer edge of the dial. This hand completes one full rotation around the dial every 24 hours, unlike the hour hand, which completes a rotation every 12 hours. The regular hour display features rectangular hour markers. The GMT function can be set to show any time zone, which is particularly useful for travelers who want to keep track of the time in their home and current time zones simultaneously. There is also a date display at the 3 o'clock position, adding another practical feature and extra value to this model.

The name "Jaros" is derived from the Yaroslavl models and belongs to the classically designed line by Poljot-International. This line continues and evolves traditional designs. The model is worn on a calf leather strap with a crocodile pattern, making it an ideal companion for both day and night.

Technical Specifications Model "Jaros GMT":

Ref. Number: 34NH.4200112

Price: 750 EUR

Movement: Seiko automatic caliber NH34, 24 jewels, date at 3 o'clock, power reserve of approximately 41 hours when fully wound

Functions: Hours, minutes, central seconds, date, and GMT display
